(54) Title: ESTROGEN RECEPTOR ALPHA REGULATED GENE EXPRESSION, RELATED ASSAYS AND THERAPEUTICS

(57) Abstract: A plurality of genes modulated by estrogen or other agents, such as hormones or combinations of hormones, in various types of tissue is described. One embodiment of the disclosure relates to a plurality of genes, which demonstrates certain patterns of expression differing qualitatively or quantitatively, with and without exposure to estrogen and/or other hormone compositions. Methods of using these genes in identifying candidate agents that exert at least some of the biological effects of estrogen and/or other hormone, and pharmaceuticals and related therapies also is disclosed. The use of the plurality of genes in methods of monitoring, in gene chips and in kits also is disclosed.

☐ Further documents are listed in the continuation of Box C.

☐ See patent family annex.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T"

later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X"

document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y"

document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&"

document member of the same patent family
